

Conflicts of Interest

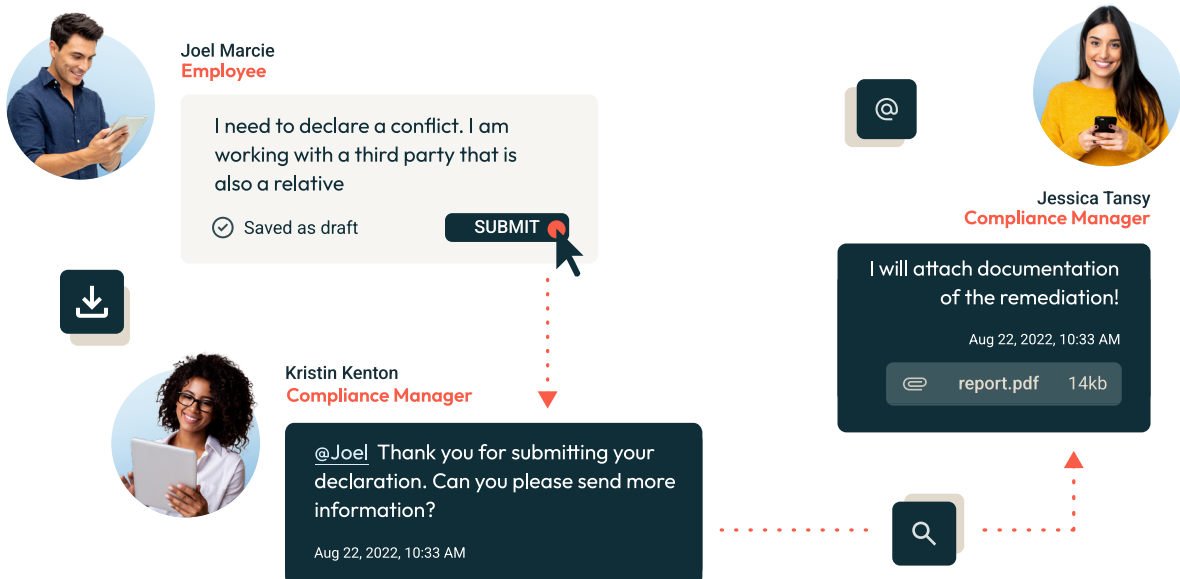

The Integrity Platform's Conflict of Interest application enables you to manage conflicts with a centralized and intuitive solution with higher visibility, a streamlined approach, and an easy submission process.

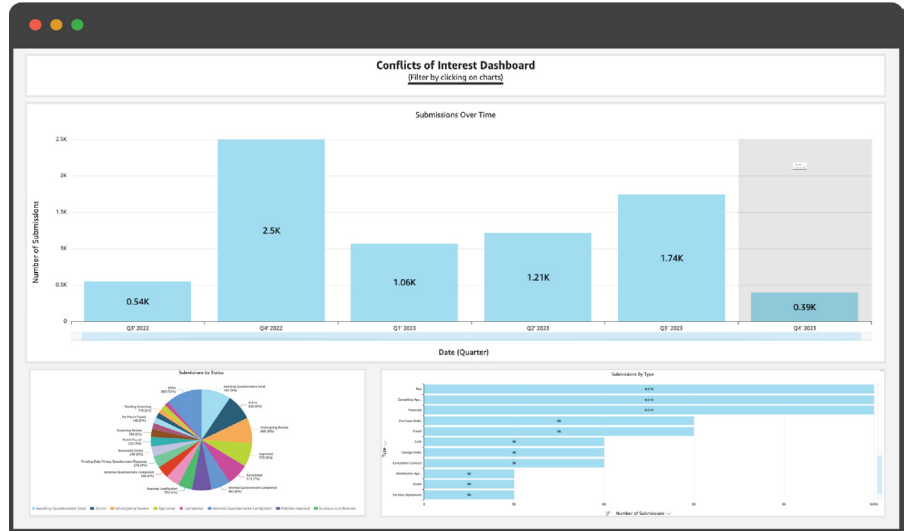

Solution Benefits

Visibility into conflicts of interest in and around your business is critical to a successful ethics and compliance program. The Integrity Platform's conflicts of interest application allows you to manage conflicts holistically from declaration to remediation bringing you:

- **Engagement and adoption:** Easy access and usability so that everyone, at any time, knows when and how to declare a conflict.
- **Tailored process:** Deploy a tailored solution to reflect your internal declaration management process.
- **Streamline approvals:** Roll out a company-wide program that easily accommodates business nuances where needed for more streamlined approvals.
- **Scalable growth:** The application's flexible workflow and user governance technology allow you to adjust processes to accommodate business change when necessary.
- **Reporting and monitoring:** Report and analyze conflict of interest data and track the performance of your program.

Manage conflicts of interest at scale

Easy submission process

Employees can easily declare conflicts ad-hoc or via periodic campaigns, using an accessible, mobile-responsive, platform that accommodates everyone's different needs and work environments.

Capture conflicts around the business

Capture potential or actual conflicts of interest during the onboarding process to ensure that future employees are not bringing unmanaged risk into the business.

Scalable design

No-code workflows and scalable role-based access controls allow for a solution design tailored to your company's organizational structure and unique business operations.

Tailored input forms

Create tailored forms to collect the data points your team needs to effectively assess and manage conflicts. Input forms are dynamic creating a low-touch and personalized experience for every user.

Enrich data through integrations

Connect your solution to the business' enterprise ecosystem and integrate with adjacent compliance processes to account for conflicts of interest that may impact ongoing approval processes in other areas of the business.

Tailored views in real-time

Leverage filters or create personalized overviews by customizing your dashboard to only show the data you need to hone in on.
