

# The Integrity Platform

Where process and ethics converge to power ethical business transformation.

The Integrity Platform, a no code, workflow orchestration platform, enables ethics and compliance teams to effectively assess and manage risk while affecting change by driving proactive ethical and compliant behaviour across the enterprise. The platform's unified view of both internal and external risks, combined with its automation capabilities, integrations and embedded analytics, transforms an organisation's ability to create a holistic view of its risk landscape and deploy a control environment to manage exposure and unlock sustainable growth.

## With the Integrity Platform you can:

- Achieve high adoption and engagement with an intuitive user experience and tailored user journeys.
- Enable risk owners to assess and manage risks as they arise with customized, parallel workstreams.
- Leverage granular role-based access control to allow the right people to access relevant data at the right time.
- Connect data within and across platform applications to get a 360 degree view of risk.
- Report and analyze on any data point across the platform and across applications to get a holistic view of risk.
- Design tailored applications or deploy our leading practice configurations.

# Applications on the Integrity Platform

Hit the ground running with the platform's leading practice solutions, tailor solutions to reflect unique internal processes or create custom configurations to meet specific regulatory and business requirements.

## Third Party Risk Management

Track the lifecycle of third-party relationships across different risk types from initial due diligence to real time monitoring on one platform.

## Donations & Sponsorships

Protect your business's reputation by easily collecting donation and sponsorship declarations through an intuitive and easy-to-use platform.

## Conflicts of Interest

Manage conflicts of interest with a centralized and intuitive solution for higher visibility, a streamlined approach, and an easy submission process.

## Incident Management

Deploy a whistleblowing and incident management solution that makes speaking up easy and case resolution streamlined.

## Gifts & Entertainment

Transform manual processes into integrated approval workflows to collect data and manage gifts, travel, and entertainment requests with an accessible and intuitive solution.

## Antitrust

Protect your business against antitrust violations with centralized management of competitive contacts, reports and violations so everyone has a single view to identify any hidden risks.

## Risk Assessment

Implement a flexible risk assessment solution to identify, assess and mitigate risks with ease.

## Build your Own

Tap into no-code technology and design a custom application to automate any process that meets your business requirements.
